KR 2003-0084560 cited in the information disclosure statement filed 8 March 2007 has been lined through since its English equivalent was cited by applicants and considered by the Examiner. Applicants are reminded that only one member of a patent family needs to be considered since all the others are substantial duplicated of the considered reference.

The non-English references cited in the information disclosure statements filed 30 May 2006 and 8 March 2007 have been considered with respect to the provided English abstracts.

Claims 10 and 14 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claims, or amend the claims to place the claims in proper dependent form, or rewrite the claims in independent form.

Claims 10 and 14 do not further limit claim 1 since the main constituent is a W-type ferrite having the formula set forth in claim 14. The formulas in claims 14 and 1 are the same.

Claims 15-17 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

These claims teach the main constituent comprising both $\text{AFe}^{2+}_a\text{Fe}^{3+}_b\text{O}_{27}$ and $\text{AZn}_c\text{Fe}_d\text{O}_{27}$. The specification teaches the main constituent comprising $\text{AFe}^{2+}_a\text{Fe}^{3+}_b\text{O}_{27}$ or $\text{AZn}_c\text{Fe}_d\text{O}_{27}$. This discrepancy needs to be corrected.

Claim 1-9 and 18-22 are allowable over the cited art of record.

There is no teaching or suggestion in the cited art of record of a ferrite material having the composition of claims 1 and 18.
